

## Gunner Belt and Lanyards

P/N 6008 1600 series

Gunner belts, also known as monkey belts or body positioning systems, are designed to keep the user secured inside the helicopter during open door operations. As such, a gunner belt is a vital piece of Personal Protection Equipment.

Lite Flite gunner belts come in multiple configurations, all built from the same basic construction. A wide, reinforced lumbar support with fixed lanyard or a tang/d-ring combination for attaching a removable lanyard. The lanyard is equipped with a length adjuster that does not loosen due to vibrations and wind blast. For added security, the adjustable front piece of the belt can be equipped with dual click lock buckles.

### Specifications

- Waist width adjustable 60 to 150 cm
- One or two click-lock buckle closure
- Fixed or removable adjustable lanyard
- Low profile karabiner fits most hard points
- Breaking strength > 15 kN
- Max. user weight 150 kg
- Carry-on equipment: Standard, off-the-shelf parts

### Materials

- MIL-W-4088 webbing type IX, breaking strength > 7000 lbs
- MIL-W-4088 webbing type VII, breaking strength > 6000 lbs
- Hardware made of corrosion treated stainless steel and sea water resistant, anodized 6082 aluminium

### Life Cycle

- Recommended life time: 5 years from initial use
- Annual maintenance: Inspection and certification
- Daily maintenance: Flush with cold tap water
