

Rescue Sling Strops

P/N 600873xx series

Rescue strops, or "strops" in short, comes in all sorts, from medium or heavy weight strops for helicopter rescue purposes to traditional light weight strops for personal, maritime use.

Lite Flite strops are open or closed, come with casualty self securing handle, outside reflective stripes and non-slip surfaces on the inside. Standard colour is bright orange for high visibility. All hardware are made of anti-corrosion treated stainless steel and are compatible with any hoist hook.

Our double sling strop features an integrated secondary sling for leg support, safeguarding casualties suffering from hydrostatic squeeze.

Our unique rescue sling wrap ensures the ultimate safety for the casualty. The wrap offers a comfortable semi sitting position, ideal for extracting casualties without having to use a stretcher or traditional strop.
