

LITE FLITE NEWSLETTER #4

AUGUST 2010

Lite Flite congratulate the Danish Air Force on the 60 years anniversary. A real spectacular air show was launched at the nearby Skrydstrup Air Base with a lot of interesting war birds participating.

This beautifully restored T-6 HARVARD visited us at Vamdrup prior to the air show with Thomas "TOM" Damm in the cockpit. It is a rare nice sound to listen to the 600 horse power Wasp radial engine.

New Distributor

We are happy to welcome Mr. Eddie Ho, the general manager of Techcom Security Technology Limited in Hong Kong as the latest distributor of LITE FLITE helicopter rescue equipment. With close connections to the SAR squadrons in Hong Kong and mainland China we are confident that Mr. Eddie Ho and Techcom Security will be the correct platform to enter the Chinese market. We wish Eddie all the best of business progress in the future.

New Guide Line

We are happy to introduce the newest type of guide-lines for helicopter rescue. To increase the visibility of the hi line during rescue operations in

dusk and night conditions, we are now ready to deliver a 10 mm soft polyester line in bright RED and YELLOW colours with in-woven reflex stripes.

In the helicopter spotlight the reflex stripes transforms the hi-line into a 50 m glowing worm. Extremely effective. We can deliver the new glowing guide line in every length desired, mounted with a thimble in both ends ready for break cord and weight bag. You will love it. Please ask for quotation in your length.

Mrs. Bucket

Nobody wants a wet guide line floating around at the floor of a SAR helicopter. Therefore we introduce Mrs. Bucket which is a semi stiff vinyl bucket able to contain the retracted guide line.

Equipped with zipper top and snap hook strap in the bottom. Very handy and easy to operate. Please ask for P/N 60081530.
